

### Table of Panormia MSS

This is a very summary list. An asterisk indicates that the book has been studied for this project directly, either physically or in microfilm. The rest of the descriptions come from the published catalogues, from the studies of G. Fransen, B. Brasington, P. Brommer and C. Märtl and others listed in the bibliography, or from information supplied by colleagues. These are not noted for each case. The further references are highly selective. Those mss given a siglum are cited in that form in the notes. Dates of mss are usually taken from the literature, even when startlingly inconsistent, unless the ms has actually been seen, and are not much better then. Earlier locations are not ultimate provenances. Literature means only refs from which the entry comes. The bibliography of each ms is almost infinitely extensible.

Qe:	*Poitiers Médiathèque François Mitterrand 834	s. xii. Long lines; France. ex- archives of Chateau de Cursay (pres. to BM in 1942). Almost all in a single small and very neat hand	fos 100-183v to 8.134. Supplement to fo. 191 has part of Prologue, extracts from letters and sermons of Ivo. Main text sometimes related to Tb, like which it has summaries repeated at the head of each book. Rubrics, apparently in second hand, to end of Bk 3, later only very rarely. Some additions in mgs. A quire missing before the contents list, and three leaves missing, one covering 1.121 end to 1.134 med, the second 2.72-85 med, the third in the Prologue. Text closely related to that of Ph, less so to Tb.	<i>Yves de Chartres, Correspondance</i> ed. J. Leclercq (1949), xxxii. A detailed account by Dom Minard is held with the ms. MB

Double columns with elegant line drawings in major initials.	fos. 1-46; has Preface, capitulatio, 1-2.125 med. only (end of quire). Many rubrics in main text, more and fuller ones in mg, app. by second hand. These are largely unrecorded in the apparatus. The text rubrics and inscr. end with 2. 59; mg. rubrics in one annotating hand continue to 2.90; a second continues to 2.104. In general the quality of the script declines as the book goes on. Text shows some convergence with Oa, but is full of error, little of it recorded in the apparatus		M. Palma, 'Sessoriana', <i>Sussidi eruditi</i> 32 (1980) 17. MB
