

Concordance between Panormia, *Decretum*, Arsenal 713B and the Coll. in Four Books.

This is simply a finding list. It's chief purpose is to provide a guide to analysing further manuscripts, and the references are reduced to the barest minimum. For the manuscripts of the *Decretum* I have used a modified version of the scheme used by Landau in his fundamental study<sup>1</sup>. It should be read in conjunction with the list of manuscripts, and particularly with the *Conspectus*, which records many more additions than are noted here. Manuscripts listed there have been scrutinised throughout for additions and omissions up to 8. 136. The references to the Collection in Four Books are taken essentially from the description by Gilchrist, supplemented by the analysis of the enlarged form found in London, BL ms. Arundel 173 by Fowler-Magerl.
